SAFETY

PLATFORM

MOBILITY

EQUIPPED WITH
- Long term cares, Nursing, Home care, Clinics, Academic studies.

Made of steel construction. Gas metal arc welding technique provides strength and durability.

All metal constructions are painted with the high quality epoxy powder paint at 180°C.

HB 285, backrest and leg part movements are made by 4500 N/m<sup>3</sup> electrical dual actuators. Foot part manually movable with mechanical lever.

Massive wood head and foot boards, and foldable aluminium side rails secure the patient.

The bed platform is covered with anti-bacterial, special design ABS thermo-vacuum plastic coating.

HB 285 has four wheels with 125 mm diameter. Two wheels with diagonal breaking system.

IV pole, universal brackets for lifting pole and orthopedic traction set.
